SKILLS

- **Languages**: Java, C, C++, Python, and SQL.
- **Frameworks**: Pandas, NumPy, Matplotlib, Seaborn and Scikit-learn.
- **Tools/Platforms**: VS Code, Microsoft Excel, Power BI, Canva, Git and GitHub.
- **Soft Skills**: Problem-solving, Team Player, Project Management, Adaptability, Time Management

INTERNSHIP

Central Coalfields Ltd – a subsidiary of Coal India Limited (CIL): GitHub-link — Jun 2025

- Architected a web-based interface to streamline and digitalize the internship selection workflow, minimizing the manual handling by 60-70%.
- Assembled authentication and application components such as user onboarding, access validation and internship submission Google Form.
- Initiated a PHP-driven application status monitoring feature to enhance visibility and reduce follow up overhead (partially incomplete).
- Enhanced usability and operational efficiency by restructuring UI layouts, lowering average processing Effort per application by 40-50 %.

Tech: HTML, CSS, JavaScript, PHP.

PROJECTS

Machine Learning – Real Time loan approval prediction model: GitHub-link Live-project-link — Oct 2025 – Dec 2025

- Engineered a machine learning-based loan approval prediction system using Random Forest to evaluate applicant eligibility.
- Processed and curated a US-based loan dataset by handling missing values, encoding categorical variables and Performing feature selection.
- validated the model performance using appropriate evaluation metrics to ensure reliable prediction outcomes.
- Deployed the trained model through a Flash-based web interface on render, enabling real-time user interaction.

Tech: Python, Pandas, NumPy, Matplotlib, Seaborn, Flask API, Render, HTML, CSS, JavaScript.

My Secret Files Locker: GitHub-link — Jun 2025 – Aug 2025

- Created a standalone desktop application focused on secure file storage and controlled file access.
- Implemented credential-based authentication to restrict unauthorized usage of the application.
- Designed an encryption workflow to protect sensitive files during storage and access operations.
- Ensured data confidentiality by maintaining encrypted file integrity throughout the application lifecycle.

Tech: Java Programming, Java Swing, Java AWT.

Operating System – Real Time Process Monitoring Dashboard: GitHub-link — Mar 2025 – Apr 2025

- Built a real-time system monitoring dashboard to visualize CPU utilization, memory consumption, disk usage, and active process states. Utilized Psutil to fetch the live OS process data.
- Utilized the psutil library to retrieve live operating system metrics efficiently.
- Optimized data polling and UI refresh cycles to maintain smooth and low-latency updates.
- Enhanced system observability by presenting resource usage in an intuitive and structured format.

Tech: Python, Psutil, Tkinter, GitHub.

Stargazing Guide – An AI Chatbot: GitHub-link — Mar 2025 – Apr 2025

- Constructed an AI-powered web-based stargazing guide to assist users with astronomical queries.
- Integrated the Gemini API to generate intelligent and context-aware responses.
- Incorporated location-fetching services to provide region-specific stargazing recommendations.
- Improved user engagement through a clean, responsive interface and dynamic content delivery.

Tech: HTML, CSS, JavaScript, Gemini Api, GitHub.

CERTIFICATES

- NPTEL Deep Learning Course Completion.| NPTEL — Jan 2025 - Apr 2025
- AWS Cloud Computing from ASD Kolkata. | ASD — Oct 2025
- Course Completion Certificates from Neo Colab for C++, DSA with C++ and Java.| Neo — Aug 2024- May 2025

EDUCATION

Lovely Professional University. — Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.91** — Aug 2023-May 2027

Dav Sr Sec Public School, Ramgarh. — Ramgarh, Jharkhand
Intermediate; **Percentage: 85** — June 2020-April 2022

Kendriya Vidyalaya, Banka. — Banka, Bihar
Matriculation; **Percentage: 88** — April 2019 - March 2020
